

"They really enjoy it. They find it fun but they're learning. I've seen progress, it works!" **Class teacher in Lambeth.**

"As I met with the older pupils in Year 5 and 6, what became apparent was that they were better placed to articulate how MOTM was helping them to progress in maths." **Maths lead in Lambeth.**

"At first it is hard, but once Jack explains it I get it. The games really help me with my maths as they keep me energised and focused on the maths problem I am trying to solve." **Bianca -Year 5 pupil**

"I find that after I have been to MOTM I can follow the lessons in class more easily, I can understand the things Miss K is doing." **Malik - Year 5 pupil**

"In class we were not really understanding the maths so we always need an adult to explain things to us, but I have noticed that all of us that attend MOTM have been working much harder and we have needed less support during lessons." **Thierry - Year 5 pupil**

"All of the children I have spoken to explained that they had lots of fun, but really felt they were learning new mathematical concepts and skills. They also really liked the way they were able to measure progress within the lesson - worksheet 0/5 - teacher model + game - worksheet 3/5 or 5/5. This approach seems to have really boosted their confidence in their math ability." **Maths lead in Lambeth.**

Through the activities they get to learn a lot. They come away feeling more energetic and confident. Some of them have got a lot out of it." **Class teacher in Lambeth**

"I love the fact that they enjoy it. They don't realise that they're doing maths so they are really engaged. The repetition has really helped with their times tables." **Class teacher in Lambeth.**
